Aerate to rejuvenate.....

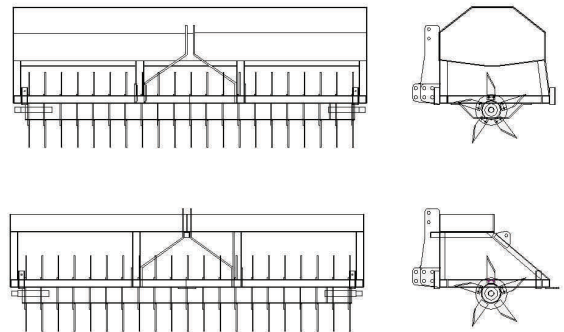

The K Two Aeravator range of grass slitters and aerators are designed to rejuvenate, aerate and relieve surface compaction of grass fields and amenity turf land. Available in two formats, with either a weight tray for the customer to supply their own form of ballast or available with a water tank of 1100l. Volume to provide up to 1100kg of ballast which, they have the ability to penetrate in the hardest of conditions.

Standard Features of the K Two Aeravator Range:

- 5 blades per rotor ring creating the highest number of indentations per acre of any machine on the market.
- Adjustable headstock to offset the working angle of the machine.
- Heavy duty rotor bearings with bearing protectors.
- Adjustable parking stands.

New for 2010!

K Two Aeravator 600 with 6.00m working width, 1270l. of water ballast and hydraulic folding for transport
